

RING SIZING GUIDE

INSTRUCTIONS

- All ring sizes in this guide are based on the UK sizing system, measured in millimeter's (mm).
- For accurate results, please print this guide on A4 paper (210 × 297 mm).
- Ensure your printer settings are set to 100% scale or Actual Size before printing.
- Confirm accuracy using the measuring scale provided.
- Avoid measuring your fingers in extremely hot or cold conditions, as temperature can affect finger size.
- Wide bands (5 mm+) may require sizing up. Please contact us if unsure.

MEASURING SCALE

OPTION 1 - SELF MEASUREMENT

- Using the paper ring sizer below, Wrap the paper snugly around the widest part of your finger, with the numbers facing out, and insert the pointed end through the slit.
- Note the number that aligns with the slit—this is your ring size. If you fall between whole sizes, choose a half size.

- Cut out ring sizer and wrap it around your finger and insert the end through the slit.

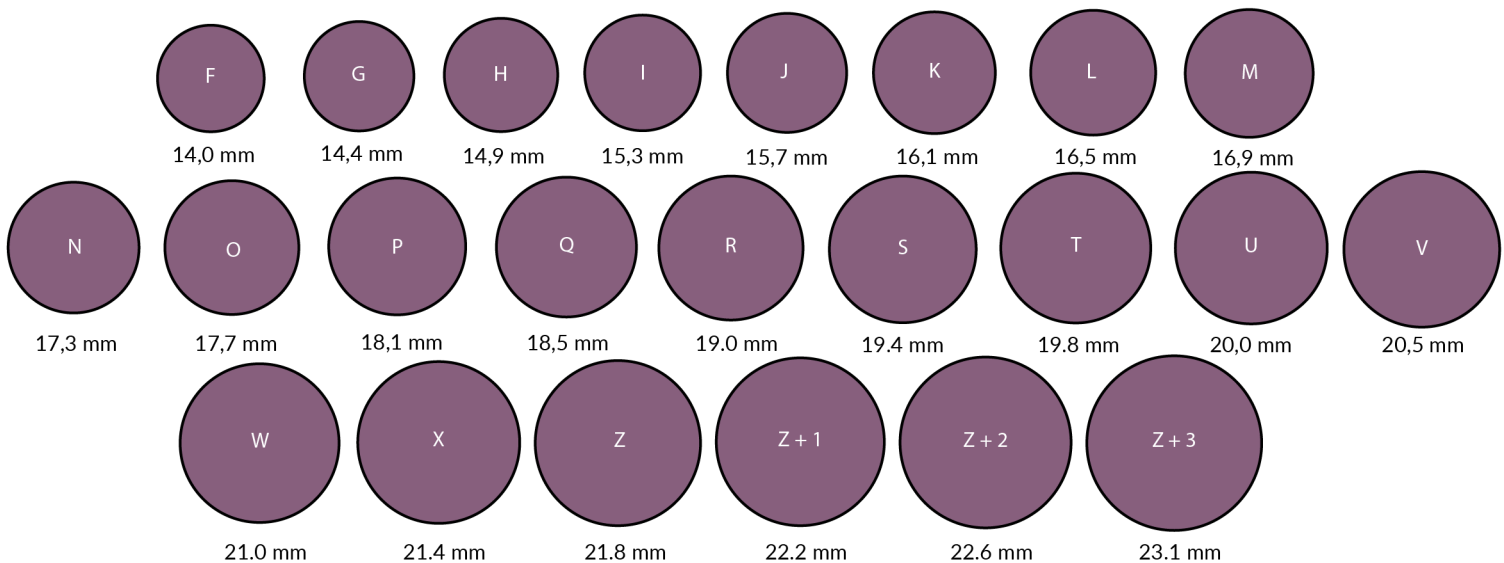

- Note the letter that lines up in the slit

OPTION 2 - SIZING A CURRENT RING

- Place your existing ring over the printed circles and find the one that most closely aligns with the ring's inner edge.
- Each circle shows the UK size letter and the corresponding inside diameter in millimeter's.
- If the ring falls between two sizes, select the quarter size in between.. Refer to the ring size chart for sizes correspondent to the ring sizes below.
